

Quality Management System Policy

The Environmental Department Water Division is committed to managing the drinking water system of The Township of Stirling-Rawdon by providing an efficient and effective system of water mains, treatment plant and elevated standpipe and appurtenances all in accordance with the Ontario Drinking Water Protection Regulations and is committed to the continuous improvement of its Drinking Water Quality Management System for the production, treatment and distribution of a safe supply of potable water while striving for the adherence to regulations and maintaining consumer confidence in the Municipal water supply. Consumer confidence in the drinking water quality shall be achieved through a proactive approach to meet applicable drinking water legislation, regulations and standards. Drinking water quality is ensured by competent employees who are dedicated to providing reliable, safe drinking water to the community of Stirling-Rawdon.
