

Note to Municipalities and Planning Boards

This form is to be used by municipalities and planning boards for the approval of an adopted official plan or plan amendment if the Ministry of Municipal Affairs and Housing is the approval authority. In this form, the term "subject land" means the land to which a proposed official plan or plan amendment applies.

Instructions

Become familiar with the Provincial Policy Statement before completing and submitting this application.

Appendix 1 is a checklist of significant provincial features. It describes information needed to determine whether significant provincial features or an existing development circumstance may be affected by a plan amendment which proposes to change, add, replace or delete a policy or designation that could have an impact on the use of a specific site.

Please complete Appendix 1.

Consultation with Municipal Affairs and Housing

The *Planning Act* requires council to consult with the appropriate approval authority and the prescribed public bodies in the course of preparing a plan. This includes an official plan or plan amendment prior to council/planning board adoption of the document. The Ministry of Municipal Affairs and Housing (MMAH) will review the submission, give advice and guidance, as well as provide a co-ordinated provincial response through the One Window planning service.

The One Window planning service is premised on early consultation. This service provides guidance and advice on provincial planning requirements early in the planning process, helping municipalities to avoid unnecessary delays and costs later in the plan review and decision-making process. Please contact MMAH for more information on this service.

Submission of the Application

The **mandatory** information in this form that **must** be provided by the municipality or planning board is indicated by **black arrows** on the left side of the section numbers.

Please note that the information to accompany an amendment as prescribed by Ontario Regulation 543/06 to the *Planning Act* must be completed in this form or included in the material(s) submitted to the Minister with the record.

Submission of digital report(s)/electronic copies is encouraged but this does not replace the ministry's requirement for hard copies.

Refer to the last page of this application form for a checklist of the ministry's submission requirements.

All measurements must be in **metric units**.

Indicate if there are any significant wetlands, significant coastal wetlands or unevaluated wetlands present on the subject lands or within 120 m.
Significant woodlands and valleylands south and east of the Canadian Shield; Significant wildlife habitat; Significant Areas of Natural and Scientific Interest (ANSI)			Development and site alteration are not permitted in the feature unless it can be demonstrated that there will be no negative impacts on the natural features or their ecological functions. Indicate if there are any significant woodlands, significant valleylands, significant wildlife habitat, and Areas of Natural and Scientific Interest (ANSIs) on the subject lands or within 50 m.
Fish habitat			Development and site alteration are not permitted in fish habitat except in accordance with provincial and federal requirements. Is any fish habitat on the subject lands or within 30 m? Is any lake trout lake on the subject lands or within 300 m? If yes to any of the above, an environmental impact study may be required.
Adjacent lands to natural heritage features and areas			Development and site alteration are not permitted on adjacent lands to natural heritage features unless: <ul style="list-style-type: none"> • the ecological function of the adjacent lands has been evaluated; and • it has been demonstrated that there will be no negative impacts on the natural features or their ecological functions.
Sensitive surface water features and sensitive groundwater features			Development and site alteration are restricted in or near sensitive surface water features and sensitive groundwater features. Demonstrate suitable mitigation measures and/or alternative development approaches to protect, improve or restore sensitive surface water features, sensitive groundwater features and their hydrologic functions.

Development Circumstances OR Features of Interest to the Province	(a) If a feature/land use, is it on site or within 500 m OR (b) If a development circumstance, does it apply?	If a feature/land use, specify distance from site (in meters)	Additional information that may be required
Water quality and quantity			<p>An assessment is generally required to determine potential impacts of development proposals on water quality and quantity.</p> <ul style="list-style-type: none"> • If the proposal is adjacent to a water body such as a lake or stream, wetland, spring, or ground water recharge area, an impact assessment on the water body may be needed. • As well, in areas of high water table, fractured bedrock or thin overburden, a hydrogeological report may be required in accordance with the Ministry of Environment (MOE) D-Series Guidelines. <p>(These are not the only instances when a technical study may be needed).</p> <p>Development adjacent to a lake trout lake must address other requirements. Consult with the Ministry of Municipal Affairs and Housing early in the planning process.</p> <p>The province has particular interests in lake trout lakes.</p>
Natural hazards			<p>Development should generally be directed to areas outside of hazardous lands and hazardous sites.</p> <p>Is the proposal within:</p> <ul style="list-style-type: none"> • a dynamic beach hazard? • the defined portions of the one hundred year flood level along the connecting channels of the Great Lakes? • areas that would be inaccessible as a result of flooding, erosion or dynamic beach hazards and a floodway? <p>Is the proposal subject to limited exceptions such as:</p> <ul style="list-style-type: none"> • safe access appropriate for the nature of the development and the natural hazard? • Special Policy Area? • uses which by their nature must locate in the floodway? <p>Where development is permitted in portions of hazardous lands and hazardous sites not subject to the above prohibitions, flood-proofing, protection works standards and access standards must be adhered to. In addition, vehicles and people need to have a way to safely enter and exit the area, hazards cannot be created or aggravated and there can be no adverse environmental impacts.</p> <p>Is the subject land within or partially within:</p> <ol style="list-style-type: none"> hazardous lands adjacent to the shorelines of the Great-Lakes - St. Lawrence River System and large inland lakes (includes flooding, erosion and dynamic beach hazards)? hazardous lands adjacent to river, stream and small inland lake systems (includes flooding and erosion hazards)? hazardous sites (includes unstable soils and unstable bedrock)? a special policy area shown in an approved official plan? the flood fringe in an area subject to the two zone concept of floodplain management? <p>If the proposal is in a hazardous area, demonstrate how the hazards will be avoided, or where appropriate, addressed through standards and procedures such as flood-proofing and protection works.</p>

Development Circumstances OR Features of Interest to the Province	(a) If a feature/land use, is it on site or within 500 m OR (b) If a development circumstance, does it apply?	If a feature/land use, specify distance from site (in meters)	Additional information that may be required
Human-made hazards ⁴ including mineral aggregate operations, mine hazards and high forest fire hazards			<p>Development proposed on abutting or adjacent to lands affected by: mine hazards; oil, gas and salt hazards; or former mineral mining operations, mineral aggregate operations or petroleum resource operations, may be permitted only if rehabilitation measures to address and mitigate known or suspected hazards are under-way or have been completed.</p> <p>Are the subject lands on or within 75 m of existing un-decommissioned oil and gas works?</p> <p>Are the subject lands on or within 1000 m of a salt solution mining well?</p> <p>Demonstrate how the hazard(s) will be addressed.</p>
Mine hazards, former mining operations, or rehabilitated and abandoned mine sites			<p>If the proposal is on, adjacent to, or within 1000 m of mine hazards, former mining operations, rehabilitated mine sites, abandoned mine sites or AMIS identified sites, progressive and final rehabilitation will be required to accommodate subsequent land uses; all work undertaken must be to the satisfaction of the province.</p>
Contaminated sites			<p>To determine potential soil contamination, proponents must complete a Phase 1 Environmental Site Assessment (ESA) as per the Ministry of Environment regulation. A Phase 2 Environmental Site Assessment would be needed if the site has potential for soil contamination.</p> <p>Remediation of contaminated sites shall be undertaken, as necessary, prior to any activity on the site(s) associated with any proposed new sensitive use such that there will be no adverse effects.</p>
Crown lands ⁵			<p>Consult your local regional Municipal Services Office as the first point of contact for assistance in dealing with planning issues relating to proposals requiring the acquisition or use of Crown lands.</p> <p>Contact the Ministry of Natural Resources District Office regarding the actual acquisition or use of Crown land.</p>

Notes:

1. Class 1 Industry - small scale, self-contained plant, no outside storage, low probability of fugitive emissions and daytime operations only.
2. Class 2 Industry - medium scale processing and manufacturing with outdoor storage, periodic output of emissions, shift operations and daytime truck traffic.
3. Class 3 Industry - indicate if within 1000 metres; processing and manufacturing with frequent and intense off-site impacts and a high probability of fugitive emissions.
4. Hazardous Sites - property or lands that could be unsafe for development or alteration due to a naturally occurring hazard(s).
 These hazards may include unstable soils (sensitive marine clays - Leda, organic soils) or unstable bedrock (Karst topography).
5. Certain areas of Crown Lands are identified by MNR as being of special interests, such as lake access points.
