**Re: Non eligible Recycling Pickup**

Please note that effective July 31, 2025 non eligible locations will be picked up weekly for curbside recycling. The Thursday pick up of recycling is not to be confused with the Wednesday collection curbside for eligible sources (i.e residential). Non-eligible sources include industrial & commercial properties, non-for-profit organizations, municipal & government buildings, commercial farms, day cares, places of worship and campgrounds & trailer parks.

These services will not be compensated under the circular materials framework and will be dealt with solely by the Municipality. The collection of these materials will be for curbside collection only. Collection of large amounts of cardboard or other materials in separate bins must be dealt with by the entity themselves and will not be included in the curbside services.

The Municipality currently has two convenience depots located at our landfill sites. These depots are to only be used for eligible locations for recycling drop off.

Should you have any questions please contact the Municipal Office.

Thanks
